District Good Governance Index Jammu & Kashmir

District Good Governance Index (DGGI)

A uniform tool across Districts of J&K to assess the **Status of Governance** and impact of various interventions taken up by Central and UT Governments

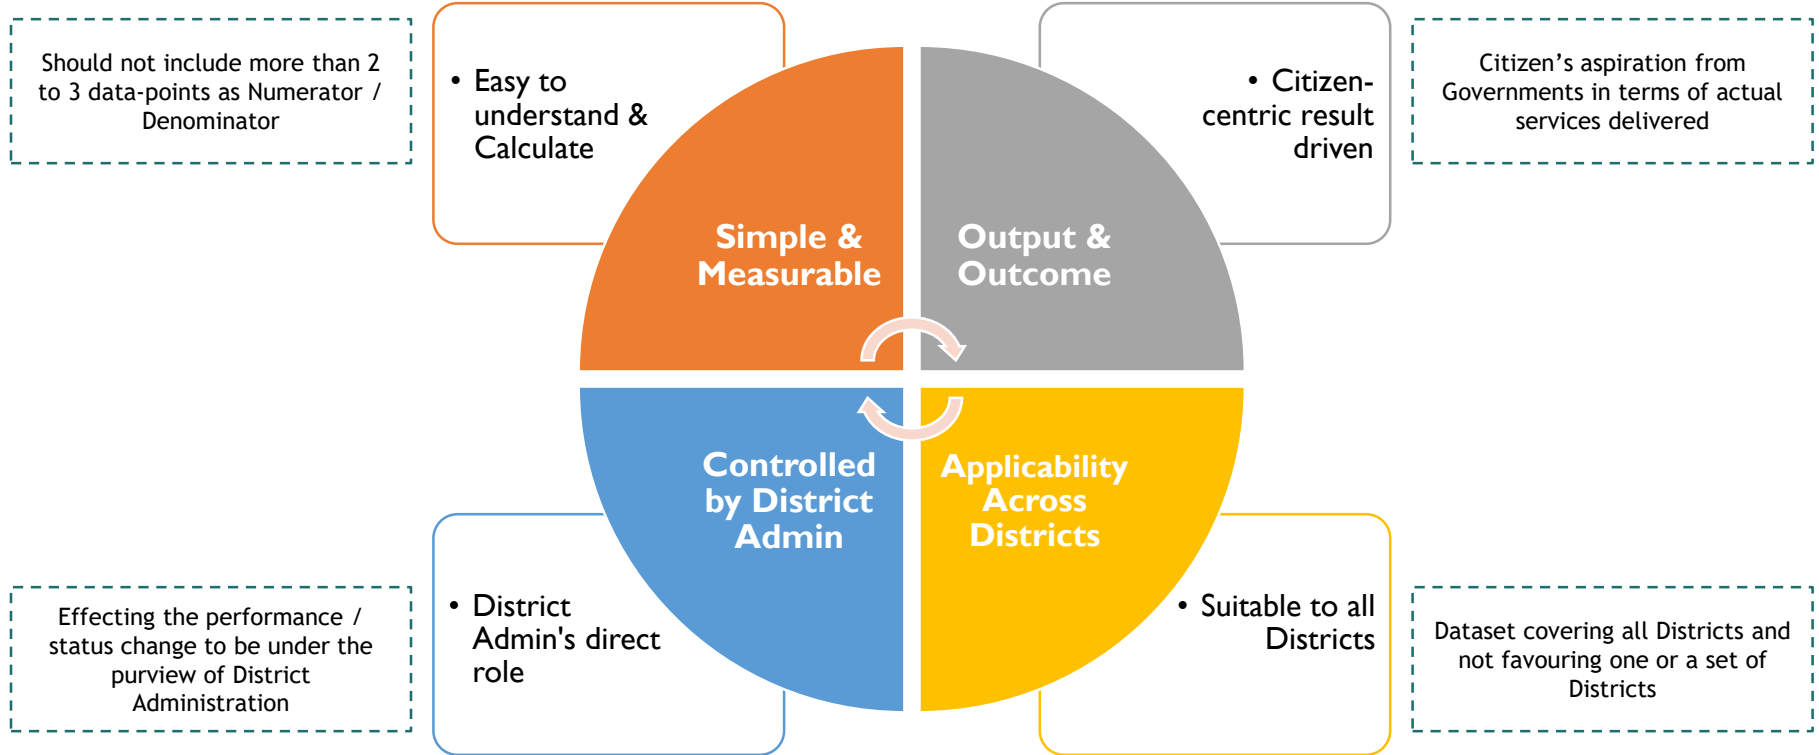

Objectives of DGGI

- Compare the State of Governance in the Districts based on collated quantitative data
- Enable District Administrations to formulate and implement suitable strategies for improving governance

Indicator Selection Principles

Stakeholders Consultations

Seven rounds of extensive consultations with the Secretary, DARPG, Govt. of India and DG J&K IMPARD and senior colleagues of the institute

Inputs of the Chief Secretary to Government of J&K for indicator finalisation and implementation strategy of DGGI

DG and Senior Officials of DES, Govt. of J&K contributed significantly

Deputy Commissioners (DCs) of Districts consulted particularly for sectors and indicators finalisation

Secretaries & HoDs of line Departments, Governance Experts, Sr. Officers involved in governance / administrative reforms, etc., consulted

Progression of DGGI

- Listing out already available data-sets/points with DES, J&K

- Consultations with stakeholders to convert data-points into indicators
- Using 2-3 data-points to formulate the indicators

- Focus on output & outcome-oriented indicators for DGGI framework
- Consent of stakeholders for finalisation

DGGI Sectors and Indicators

#	Governance Sectors	No .of Indicators	#	Governance Sectors	No. of Indicators
1.	Agriculture & Allied Sector	11	6.	Social Welfare & Development	6
2.	Commerce & Industry	5	7.	Financial Inclusion	3
3.	Human Resource Development	9	8.	Judicial & Public Safety	4
4.	Public Health	9	9.	Environment	2
5.	Public Infrastructure & Utilities	6	10.	Citizen Centric Governance	3
				Total	58

Assigning Weights

- ▶ **Indicators – Differential Weights**

Priority (higher weight) is assigned to UT & National Priorities (including SDGs)

- ▶ **Sectors – Equal Weights**

- ▶ *All Sectors are of equal importance for District Administration*
- ▶ *Heterogeneous Regions / Districts and Distinct Historical Background*

Sectors have equal weights : Indicators have different weights

Methodology

Step I

- Compilation of Necessary Data/Information

Step II

- Normalisation of Indicator Values

Step III

- Assigning Weightages

Step IV

- Computation of Scores and Ranking

Compilation of Data

Step I

- Compilation of Necessary Data/Information

Step II

- Normalisation of Indicator Values

Step III

- Assigning Weightages

Step IV

- Computation of Scores and Ranking

▶ **Fixing of base year and reference year**

- ▶ Base year as 2018-19
- ▶ Reference year as 2020-21

▶ **Sharing of data collection templates**

▶ **Division wise data-set received**

- ▶ For growth-based indicators, CAGR is calculated for reference year over base year
- ▶ For absolute-based indicators like sex ratio, gender parity index, etc. the data for reference year is used

▶ **All data validated by the DCs and DES, Govt. of J&K**

Normalisation of Indicators

Step I

- Compilation of Necessary Data/Information

Step II

- Normalisation of Indicator Values

Step III

- Assigning Weightages

Step IV

- Computation of Scores and Ranking

Dimensional Index Method

Dimensional Score for Positive Indicators:

$$\text{Score} = (\text{Indicator Value} - \text{Minimum Value}) / (\text{Maximum Value} - \text{Minimum Value})$$

Dimensional Score for Negative Indicators:

$$\text{Score} = (\text{Maximum Value} - \text{Indicator Value}) / (\text{Maximum Value} - \text{Minimum Value})$$

Where:

Positive Indicator = for which Higher Value is better

Negative Indicator = for which Lower Value is better

Indicator Value = Available through Secondary Sources

Maximum Value = Highest Indicator Value among the Districts

Minimum Value = Lowest Indicator Value among the Districts

Assigning Weightages

Step I

- Compilation of Necessary Data/Information

Step II

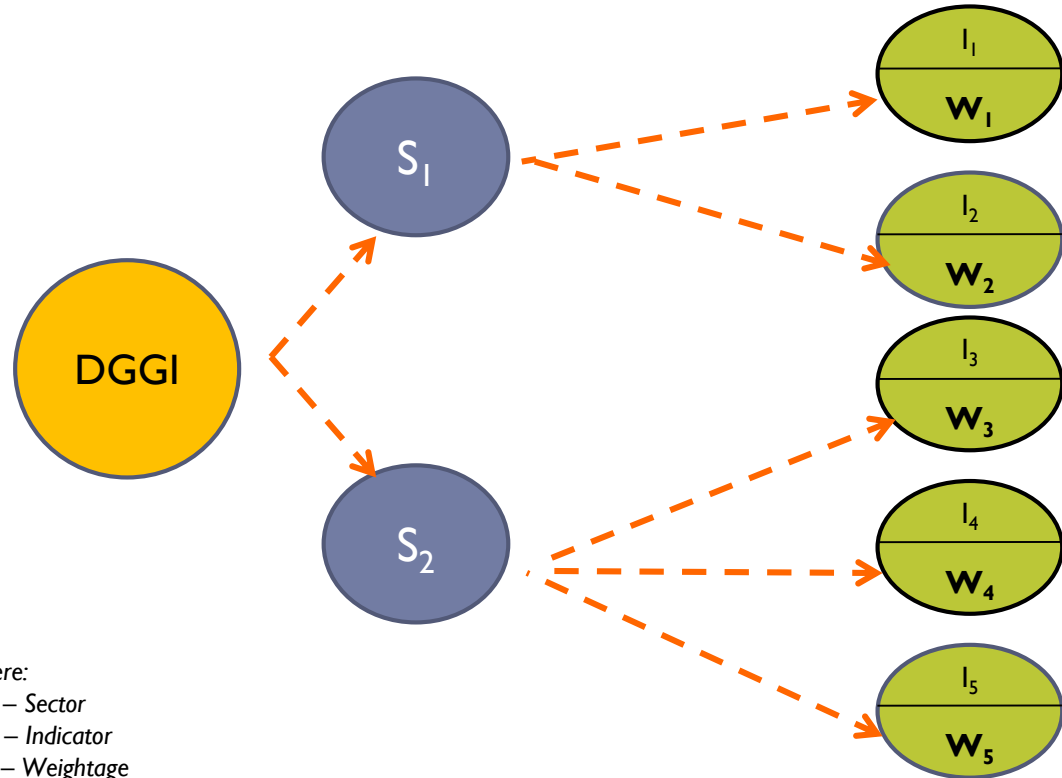

- Normalisation of Indicator Values

Step III

- Assigning Weightages

Step IV

- Computation of Scores and Ranking

Computation of Score

Step I

- Compilation of Necessary Data/Information

Step II

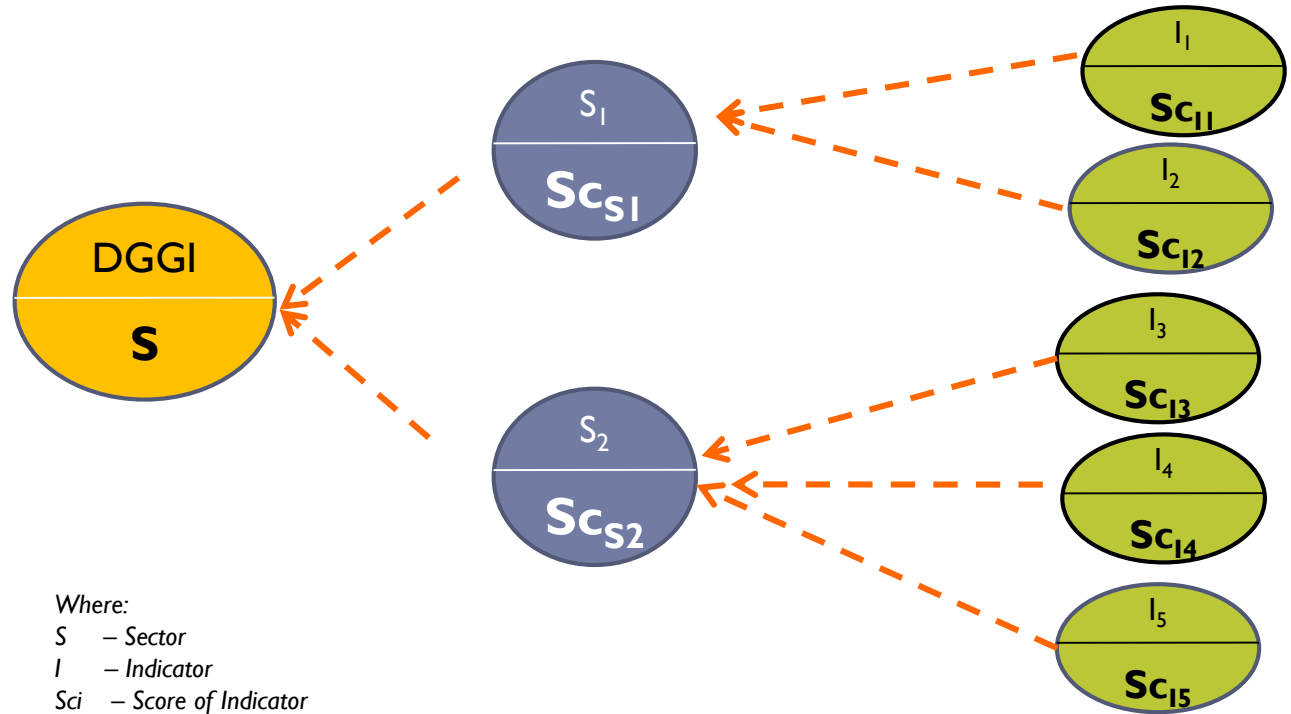

- Normalisation of Indicator Values

Step III

- Assigning Weightages

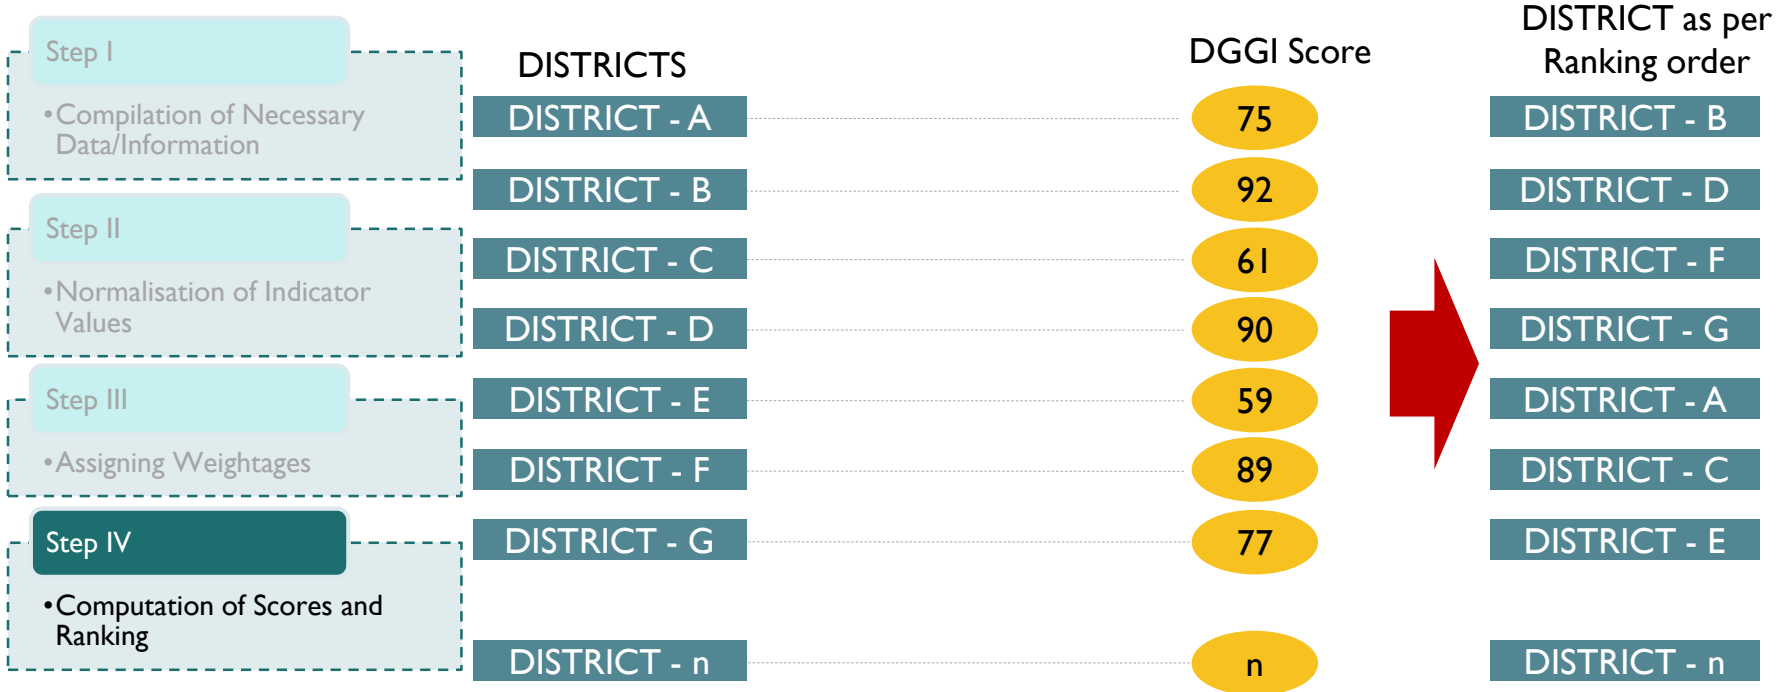

Step IV

- Computation of Scores and Ranking

Ranking

Way Forward

- ▶ DGGI of J&K is the 1st of its kind measuring District-level performance
- ▶ Supports in assessing gaps in infrastructure, service delivery and processes
- ▶ Identifies strong and weak areas for immediate improvements and measures progress on periodic basis
- ▶ Tool for data and evidence-based planning
- ▶ Lead to designing and developing real-time monitoring mechanism – aka dashboard
- ▶ Robust mechanism for latest data collation at District and UT-level

Thank You
